# GlowLight

Quick start guide

Step 1
Connect to power
Use a USB-C cable to connect the GlowLight to a power supply, external battery or your laptop for example.
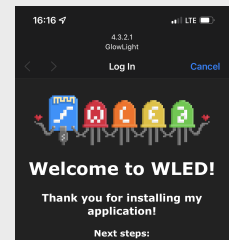

5V 2.5A required.

Step 2
Join GlowLight wifi

GlowLight

letsglow
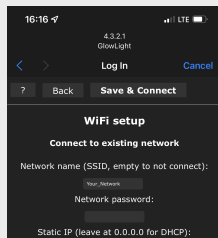

Step 3
Open control interface
A pop up window should appear. If not, open 4.3.2.1 in your web browser.

Optional
Connect to home wifi
To control GlowLight from your home wifi network, setup your wifi details.

How to
### Select color
In the "Colors" tab you select the color or color-mix.
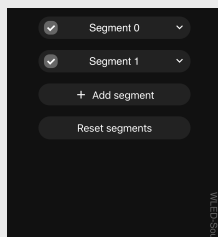

How to
Select effect
In the "Effects" tab you have all animations. "*" means they react to music.
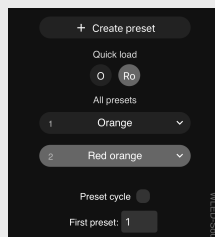

How to
Select LEDs
In the "Segments" tab you select the LEDs you want to change.

## How to
Load/save favorites
In the "Favorites" tap you can load and save your favorite effects.

How to
Change settings
Via the "Config" button you can open the settings menu.
